

ARJUN KUMAR

AI/ML Engineer | Python | Machine Learning | Deep Learning | Generative AI

arjun.kumar@email.com | +91 98765 43210 | LinkedIn: linkedin.com/in/arjunkumar | GitHub: github.com/arjunkumar |
Coimbatore, Tamil Nadu, India

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in Python, Machine Learning, Deep Learning, and Generative AI. Experienced in developing computer vision applications, training machine learning models, building REST APIs, and deploying AI-powered applications. Strong problem-solving skills with a passion for developing practical AI solutions.

TECHNICAL SKILLS

Programming: Python, Java, C++, SQL

Machine Learning: Scikit-learn, Regression, Classification, Clustering, Feature Engineering

Deep Learning: TensorFlow, PyTorch, YOLO, CNNs

Generative AI: LLMs, Prompt Engineering, RAG, AI Agents, OpenAI APIs

Backend: Node.js, Express.js, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Supabase

Tools: Git, GitHub, Docker, VS Code, Jupyter Notebook

Cloud: AWS, Vercel

EDUCATION

B.E. Computer Science and Engineering — Rathinam Technical Campus, Coimbatore | 2023–2027 | CGPA: 8.6/10

PROJECTS

RoadLens AI — AI-Powered Road Damage Detection Platform

- Developed an AI-based system to detect potholes and road cracks from uploaded images.
- Trained a YOLO-based computer vision model for road-damage detection.
- Integrated GPS information and reverse geocoding to identify damaged-road locations.
- Built a web dashboard for citizens and authorities to monitor road complaints.
- Used React, Python, Supabase, REST APIs, and machine learning technologies.

AI Resume Analyzer

- Developed an AI-powered resume screening system that compares resumes with job descriptions.
- Extracted candidate skills, education, experience, and project information from PDF resumes.
- Implemented semantic matching between candidate profiles and job requirements.
- Generated an overall compatibility score and identified missing skills.
- Built the application using Python, NLP, React, and REST APIs.

Student Performance Prediction

- Built a machine learning model to predict student performance using academic and behavioral data.
- Performed data cleaning, feature engineering, exploratory data analysis, and model evaluation.
- Compared multiple classification algorithms and selected the best-performing model.

EXPERIENCE

AI/ML Intern — TechNova Solutions | May 2026 – July 2026

- Developed Python-based machine learning pipelines for data preprocessing and model training.
- Assisted in developing computer vision models using YOLO and OpenCV.
- Created REST APIs for integrating ML models with web applications.
- Improved model inference performance through preprocessing and optimization.
- Collaborated with frontend and backend developers using Git and GitHub.

CERTIFICATIONS

Machine Learning Specialization — Coursera | Python for Data Science — IBM | Deep Learning Fundamentals — NVIDIA | Generative AI Fundamentals — Google

ACHIEVEMENTS

- Finalist in a National AI Hackathon.
- Built 5+ AI/ML projects using real-world datasets.
- Solved 150+ Data Structures and Algorithms problems.
- Active contributor to GitHub open-source projects.

SOFT SKILLS

Problem Solving • Analytical Thinking • Team Collaboration • Communication • Adaptability
